

Homeopathic Cure For Whiplash and Concussion

Whiplash is a soft tissue injury to the neck and brain resulting mainly from a rear-end car collision in which the head is suddenly snapped back and forth by the impact. The symptoms may include: headaches, neck and back pain. In more extreme cases some people may experience: memory loss, slurred speech, fatigue, depression — and the list could be quite long.

Although the patients might recover quickly, some will continue to have headaches, neck or back pain for the rest of their lives - a condition called chronic whiplash.

The conventional treatment of chronic whiplash may include chiropractic, physio and massage therapy. These are manual and physical procedures, although good they cannot heal chronic pains, but offer only temporary relief. Chronic pains like headaches, neck and back pains can be heal and cured only from inside, internally.

The big challenge for the treatment of chronic whiplash by conventional medicine and other therapies is that the sudden shock of the car accident, if powerful, can fade into the memory of the cells, and that makes it difficult to trace and treat. This is the reason why the CAT scanner, MRI or other procedures do not show any physical damage to the soft tissue of the brain or spine, even though the person experiences intense pains.

Another important aspect of the treatment is that in case of whiplash, Medulla Oblongata and the area around is the most affected during the accident. What conventional medicine is not aware of is that Medulla is a very important center for life-force. This is why a minor accident like rear-ending has such a huge, debilitating impact on the human body.

Unlike conventional medicine and other therapies, the homeopathic treatment works from the inside out. It focuses specifically on the area most affected by the shock, eliminating the trauma from the soft tissue. With the new treatment, the condition can be cured in just a few months. From the first weeks you start to feel the results. It takes in general five sessions over a fifteen weeks period to completely eliminate the problem whether the whiplash is one, ten or twenty years old.

This breakthrough treatment is equally effective for both: Whiplash and Concussion. Because is not manually done, but uses homeopathic medicines, it can be done from the distance, having the consultation over the phone/email and mailing the medicines to the patient.

Remember, we are not masking symptoms or making you feel better temporarily. We are trying to rebuilt your health and bring it back to the way it was before the accident.
